
COSADC Strategic Plan

By Bob Schneeman

Published: 09/22/2011 - 09:36

Angelou Economics of Austin Texas, was recently hired to prepare a Strategic Plan for COSADC and are seeking input from the residential and business communities in and around San Angelo to better tailor the plan to fit our needs. The consultants have prepared online surveys for the Strategic Plan Process which are now live!

The survey results will be used by the consultants to gain a wide base of public input on issues identified by various focus group participants, to finalize a Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis for the community, and to help drive the planning process as a final plan is developed.

The first link is for residents of the San Angelo area. Please note that respondents are asked to indicate whether they live within the city limits, but the survey is NOT limited to those who live within the city limits, so we encourage residents both inside and outside the City Limits to respond.

The next link is for the business survey. Again, it is not limited to those whose business is located inside the city limits; however, the respondent will be asked to identify the location of their business operations.

It should take respondents less than 10 minutes to complete each of the surveys, and we would like to get as many respondents as possible. Please take a few minutes to provide your input.
